You Can't Buy A Better Reel.

No matter what your industry, you need cable reels that improve efficiency, productivity, and safety in your operation. We meet these stringent application, installation, and function requirements with the largest model offering and custom design reel options in the industry.

Every Hannay reel is handcrafted from the highest quality materials and designed exclusively for the industry it will be used in – never retrofitted to the job. That means you can trust our rugged, dependable reels to provide perfect fit and function for years to come.

Here's what makes Hannay Reels the #1 choice of OEMs:

- Multi-position roller assembly features dual arms to give maximum support from each side.
- Heavy 14-gauge disc has rolled edges that add rigidity and strength.
- One-piece hub assembly for superior strength.
- Externally mounted spring motor and ratchet pawl lock for the most serviceable reel available.
- Drums are 304-grade stainless steel for maximum corrosion resistance.
- 11-gauge steel modular frame bolts easily to standard footprint patterns.
- Sealed axle bearings provide superior wear and effortless operation.

Mounting Hole Sizes

N Series Reels	7/16" wide x 7/8" long slot running front to back
Pressed Frame Reels and Channel Framed Reels	7/16" wide x 7/8" long slot running left to right
Utility Grounding	7/16" round holes
Series 1500, Static Grounding	13/32" round holes

Series C

**To handle 3/4" through 1" O.D. cable.
For storage only. No live connections.**

- Heavy-duty reels.
- 4-1/2" x 9" (114 mm x 229 mm) opening in the drum.
- Many optional configurations available.
- Gear-driven crank rewind; or chain and sprocket drive powered by electric, compressed air or hydraulic motor.
- Auxiliary crank rewind is available on power reels.
- Crank rewind reels supplied with pinion brake.
- Power rewind standard with a strap brake.
- Consult factory for other brakes and locking devices.
- Rollers and roller mounting brackets are accessory items. Specify roller position.
- Divider discs available. Specify spacing.
- Drum diameters other than the standard are available.
Note: Larger drum diameter reduces reel capacity.

Series C1500

• Cable • Hose • Rope • Wire

**To handle 1/4" through 1" O.D.
For storage only. No live connections.**

- Reels are designed for storage of long lengths of cable, hose, rope, wire or other materials.
- A 1-1/8" x 2-3/8" (28 mm x 60 mm) opening in the drum to initiate winding.
- Direct crank rewind, permanently attached. Removable crank option is available. Also available is a chain and sprocket rewind powered by electric, compressed air or hydraulic motor.
- Supplied with cam-lock brake on manual rewind models only.
- Optional divider discs can be placed at almost any point. Be sure to specify spacing of discs on your order.
- Rollers and roller mounting brackets are accessory items. Specify roller position.

Optional External Mounting Brackets

Part No. 9906.0027.

Custom Engineering

Custom spools and reels for cable handling and storage can be built in an almost limitless range of sizes and with a wide variety of special features, such as divider discs, slotted discs, casters, etc. All rewind mechanisms described in this catalog can be specified for custom-built reels. To meet special requirements, motors used to power chain and sprocket rewind mechanisms can be mounted off the reel or within the reel frame.

Spools include the discs, tie-rods and spacers, and the drum. Since discs are inventoried in a range of standard diameters, and drum lengths can be adjusted, spools can be supplied to accommodate a wide range of cable sizes and lengths.

Orders and quotations:

See Cable Reel Spec Worksheet on page 19 to supply proper information for orders or quotations.

Requests for quotations for custom reels and spools should include:

- Complete specifications on cable size, length, and weight.
- O.D. and bending radius of cable.
- Number of conductors, voltage, and amperage.
- Type of rewind mechanism, including available power for electric, hydraulic or air rewind motors.
- Complete description of how reel is to be installed and used.
- Specification of any accessories.

- Rescue and HazMat Operations

WARNING

These reels are for static grounding ONLY.
NOT intended for lightning protection!

For refueling or hazardous areas.

- These reels bond and/or ground aircraft, fuel trucks, and other equipment.
- Provide smooth operation and require minimum cable pull.
- Declutching arbor and adjustable guide arm with cable guide.
- Optional stainless steel construction of spool, frame, and ratchet system available on HGR Series.
- Standard finish is oven-cured enamel.
- Also available, manual rewind version.

Utility Grounding Reels

- Construction Vehicles • Utility Vehicles
- Maintenance Vehicles • Rescue and HazMat Operations

Truck grounding reels.

- Easy cable pay-out.
- Quick and convenient rewind gets you back in service fast.
- Heavy-duty steel construction stands up to demanding field use.
- Direct access to lube rotary ground device.
- Serviceable pawl and pin assembly.
- Easily greaseable Zerk fitting.
- Independently tested to 43 kA for 30 cycles.¹
- Bolt-down design.
- Manual or automatic spring rewind available.
- Helps meet OSHA requirements for vehicle grounding.²
- Supplied with or without optional cable and clamp.

¹ Although Hannay SGCR and GCR Series grounding reels are rated to 43 kA for 30 cycles (the maximum fault current rating for 4/0 cable), the size and spring pull force of the reel effectively limits use of these reels to 2/0 cable and smaller. 2/0 cable has a maximum fault current rating of 27 kA. Please refer to ASTM 855-90 (Standard Specification for Temporary Grounding Systems) for more information.

² OSHA Subpart V, Section 1926.952, requires grounding of vehicles working near energized lines or equipment. Hannay grounding reels help meet this requirement and encourage crew compliance by providing a simple, efficient method of handling heavy grounding cable.
